Projects

Books Management System in LPU-Python
That is my best project which is written in Python. In this project, 4 members in the team, and I assigned everyone parts of the project But no one worked properly so I encouraged everyone and advised everyone to read about the project and then work on the project. In this project three parts

IPL Mini Project - C++-
Ipl mini-project stores all information about cricketer and also store all cricket match score. And you can find out who won or lost the match. And the highest score, the minimum score, and who took the highest wicket. like that. That project was written in C++.

CRUD-Student Management System- Django
Add, Delete, Update, and Remove from the Database that is project.

College Management System-Django
(Currently working)
